

Make Energy Efficiency a New Amenity

MULTIFAMILY PROGRAM

Atlantic City Electric's Multifamily program offers tailored solutions to reduce energy use, enhance resident comfort, and boost your property's value and appeal.

Whether your project is simple or complex, involves in-unit upgrades, or is focused on improvements in common areas, our **financial incentives** and **expert guidance** make energy efficiency upgrades more affordable and impactful. Enhanced incentives are also available for income-eligible customers.

Solutions for Your Projects

We can help improve the energy efficiency of your entire property through one of our program pathways.

Maximize your savings through a variety of incentives.

Prescriptive and Custom Pathways

Whether you're upgrading one or several building systems, our [Prescriptive pathway](#) offers an array of high-efficiency equipment incentives to help you achieve energy savings, including lighting, HVAC, and appliances. This pathway is designed to make it easy for you to receive rebates quickly.

Don't see your equipment in the [Prescriptive pathway list](#)? No problem. Our Custom pathway is designed for upgrades not covered under the Prescriptive pathway, such as building envelope upgrades and complex HVAC improvements.

Our experts will work with you to develop a project plan tailored to your facility's needs and goals.

Engineered Solutions Pathway

If you're looking to bundle multiple projects and maximize your energy savings, our Engineered Solutions pathway is for you.

In-depth support and financial incentives:

- Comprehensive energy audit
- Engineering design and bid-ready documentation
- Assistance with selecting installation vendors
- Construction administration and commissioning
- Measurement and verification services

Flexible program management and support:

- **Tier I: Turnkey.** Features Trade Ally-led audits and full project support throughout the entire process. It is ideal for organizations that want end-to-end guidance on measurement and verification services.
- **Tier II: Flexible and Customer Driven.** Allows multi-family property participation even after the audit or design is Complete. It is ideal for those who prefer to use their own consultants.

Program Eligibility

- 1 You must be an Atlantic City Electric customer with at least one commercial electric account
- 2 Multifamily buildings must contain three or more residential units
- 3 The building owner must be the applicant/customer
- 4 The common area and/or in-unit equipment must be owned by the building owner

Ready to make energy efficiency a community amenity?

We're here to help you create a more comfortable, cost-effective, and sustainable living environment.

Interested in financing for equipment upgrades?

You may qualify for 0% interest loans on recommended energy-efficient improvements.

To get started, contact us at ace.energysavings@trccompanies.com, call **833-ACE-PAYS (833-223-7297)**, or visit atlanticcityelectric.com/Multifamily.

You must be an active Atlantic City Electric commercial customer with a valid account number to participate. See [program website](#) for guidance on program-specific eligibility and participation requirements.
