

Discover sustainable energy efficiency for your facility

Energy Management Program

Improve your energy use today and tomorrow

The **Strategic Energy Management (SEM)** offering through Atlantic City Electric's **Energy Management program** provides a holistic and systematic approach to continuous energy improvement.

Our hands-on Energy Coach will perform an in-depth building energy assessment, build your energy team, develop an action plan for tackling identified improvements, and help you measure and verify resulting energy savings—all at no additional cost.

Customers participating in the SEM offering can enjoy:

Performance incentives of \$0.02/kWh for first-year energy savings achieved from measures implemented

Reduced environmental impact

Incentive payments totaling \$4,000 for successful completion of SEM activities during the first year of participation

Competitive advantage gained in the market by becoming a sustainability leader

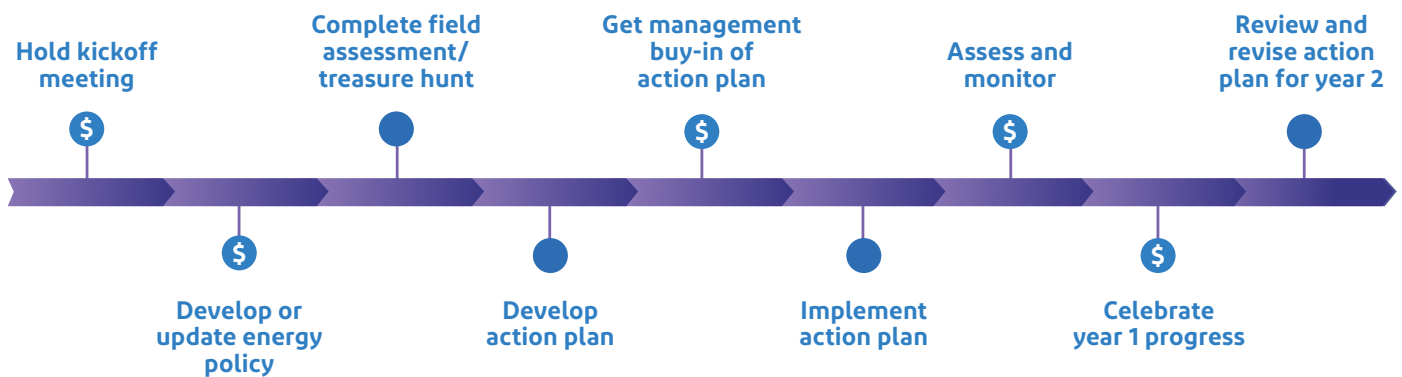

Course fees paid for up to two participants of your energy team to complete the Building Operator Certificate Course

Increased profitability by reducing overhead costs and production downtime

Year 1 of the SEM process

💰 Indicates an incentive is paid to you upon successful completion of this stage.

Eligibility

To participate, your company must be a commercial customer of Atlantic City Electric with a nonresidential account. The facility must be a minimum of 50,000 square feet, have an interval meter to streamline data collection, and have an average peak demand of 200 kW or higher over the last 12 months.

Savings start here

Act now to reduce your energy consumption. To get started, contact us at **833-ACE-PAYS (833-223-7297)** or ace.energysavings@trccompanies.com.
