

Commercial & Industrial (C&I) Prescriptive and Custom Incentive Program

ABOUT THE PROGRAM

The Prescriptive and Custom Program makes it easy for our C&I customers to install high-efficiency electric equipment across a wide range of technologies and receive quick one-for-one incentives. Prescriptive incentives cover equipment listed below for heating and cooling, refrigeration, HVAC controls, lighting and lighting controls, food service equipment, and more. Custom incentives allow for non-standard, more complex electric energy efficiency measures that are not defined as a prescriptive measure to receive an incentive.

Process

- 1. Complete and submit the Prescriptive or Custom incentive application on our online portal.
- 2. Receive a confirmation email that your application has been received. If your project meets all eligibility requirements, your application will be approved, and you can move forward with your project.
- 3. Receive your application pre-approval letter.
- 4. Install equipment and complete project completion sections of the project portal.
- 5. Receive your incentive.

All projects are subject to pre-approval and post inspection to confirm equipment installation prior to incentive payment.

For more information on all our offerings, visit atlanticcityelectric.com/WaysToSave/ForYourBusiness or contact us at 833.ACE.PAYS (223.7297) or ace.energysavings@trccompanies.com

PRESCRIPTIVE

Prescriptive Incentives are available to eligible equipment types listed below. For other models or equipment types not listed below, see the Custom Incentives that are available on the last page.

As of July 1 2023, <u>certain Energy Star rated bulbs are no longer eligible for incentive consideration</u> through the Prescriptive program, as per direction from NJ A5160 code. <u>Those bulbs have been removed from this list</u>.

Note: For lighting measures incentivized based on DLC primary use category, only products listed under v5.0 or v5.1 of the Solid-State Qualified Products List are eligible for incentive

CUSTOM INCENTIVES

The Custom pathway provides our C&I customers the opportunity to implement non-standard, more complex electric energy efficiency measures that are not defined as a prescriptive measure. Through the Custom pathway, we help customers develop tailored projects that best meet their unique facility and organizational goals. Custom Measures do not include maintenance or repair measures such as compressed air system leak repair. Custom projects are typically multi-measure or optimization solutions for which customers earn performance-based incentives using \$/kWh.

CUSTOM MEASURES	
Typical Custom Equipment and Building Improvements	Incentive
Compressed Air	
Refrigeration	
Data Center Equipment/Servers	
HVAC/Chillers	The lesser of:
HVAC Controls	\$0.16 per kWh saved annually
Motors/VFD	(first year) OR 50% of the eligible
Building Improvements	project cost.
Process Improvements	
Agricultural Lighting/Process	
Custom Lighting	

¹ All rebates will be offered equal to or less than the "Up to" value
