

# Get Your Building Running Like New

## ENERGY MANAGEMENT PROGRAM Retro-Commissioning (RCx)

Atlantic City Electric's **Retro-Commissioning (RCx)** offering ensures that your building management systems and controls are working at their optimal efficiency and functionality. Designed for large businesses, RCx identifies and implements measures that restore mechanical, electrical, and thermal systems to their original or an improved design.

### RCx Eligibility

- All commercial and industrial customers with a minimum average peak demand of 300 kW (inquire about exceptions)
- Recommended facility size of 50,000 square feet or greater
- Facility is not new construction or a gut rehabilitation, and has not been commissioned within the past three years
- Functional building automation control system (recommended)
- Work completed with an RCx Trade Ally, including implementation of all upgrades identified in the investigation report to retune existing mechanical, electrical, and thermal systems with an 18-month payback or less

### RCx Measures

- Equipment scheduling
- Water temperature reset
- Night setbacks
- Sensor calibration or replacement
- Valve actuator calibration or replacement

### Unlock big savings!

Capital improvements like **variable frequency drives, lighting upgrades, and system redesign** can be identified through this offering—**apply for incentives through either the Engineered Solutions or the Prescriptive and Custom programs.**

Incentive available to support the feasibility and investigation through an approved Trade Ally.

Performance incentive of \$0.16/kWh applied toward the project not to exceed 70% of the project cost.

**To find a Trade Ally near you,** visit [atlanticcityelectric.com/EnergyManagement](https://atlanticcityelectric.com/EnergyManagement) or call us at **833-223-7297**.
