

# Tune Up Your Energy Efficiency

## ENERGY MANAGEMENT PROGRAM Building Tune-up

Atlantic City Electric's **Building Tune-up offering** is designed to help your building systems operate at peak performance—today and tomorrow.

In the same way a tune-up helps your car run better, we optimize your facility's existing electrical, mechanical, and control systems. By monitoring, troubleshooting, and adjusting these systems, you could save an average of 5% to 20% on energy costs annually.

We also offer incentives that cover up to 80% of your project's cost—which has already saved thousands for businesses just like yours.

### Savings at a Glance\*

Lighting Optimization

**\$0.32/kWh**

HVAC Optimization

**\$0.64/kWh**

Chiller Optimization

**\$0.64/kWh**

Refrigeration Optimization

**\$0.64/kWh**

Electric/Other Optimization

**\$0.64/kWh**

Gas Optimization

**\$10.00/therm**

\*Up to 80% of project cost

Our **Building Tune-up offering** adjusts and calibrates a variety of systems to improve your energy efficiency, including:

## Lighting Optimization

- Reprogramming lighting control panels for better schedules (e.g., reduced evening operation)
- Adjusting daylight sensors for improved response
- Tuning occupancy sensor time delays and sensitivity

## HVAC Optimization

- Calibrating thermostats and sensors
- Reprogramming economizer controls for better free cooling
- Adjusting ventilation based on occupancy patterns

## Chiller Optimization

- Resetting chilled water supply temperatures based on load
- Improving sequencing of multiple chillers
- Calibrating flow meters, temperature sensors, and control valves

## Refrigeration Optimization

- Fine-tuning the defrost cycles
- Calibrating temperature setpoints and sensor readings
- Adjusting suction pressure settings for compressors

## Electric/Other Optimization

- Recalibrating variable frequency drives for pumps or fans
- Tuning building automation system settings for improved equipment schedules
- Adjusting motor controls to better match operational needs

*Installation of new systems, equipment, or controls, and repairs on existing equipment are not eligible for incentives under this program.*
