

Smarter Buildings, Bigger Savings

Optimize. Monitor. Save.

ENERGY MANAGEMENT PROGRAM Monitoring-Based Commissioning (MBCx)

Atlantic City Electric's **Monitoring-Based Commissioning (MBCx)** offering allows you to take control of building operations. Designed for large businesses, MBCx uses monitoring software to deliver real-time, data-driven diagnostics. When integrated with your existing building automation system, it identifies operational issues, improves occupant comfort, and reduces energy by 15% or more.

MBCx Eligibility

- All commercial and industrial customers with a minimum average peak demand of 300 kW (with exceptions)
- Recommended facility size of 50,000 square feet or greater
- Facility is not new construction and has not been commissioned within the past three years
- Functional building automation control system (required)
- Customer must work with an MBCx Trade Ally and install eligible MBCx software with Fault Detection and Diagnostics. They must sign a monitoring service contract of at least 18 months.
