

Helping Public Institutions Save With Energy Efficiency Upgrades

DIRECT INSTALL FOR PUBLIC SECTOR PROGRAM

Atlantic City Electric's **Direct Install for Public Sector** program makes it easy for public institutions, such as K–12 schools, community colleges, county facilities, and townships and municipalities, to upgrade their facilities with energy efficiency solutions.

This is a BPU-approved pathway. By working through a vetted network of Trade Allies, projects can move forward without the time and complexity of a competitive procurement process. The result? Streamlined implementation, governance on pricing, lower costs, and lasting energy savings for your institution.

With the Direct Install for Public Sector program, you can:

- Receive up to **80%** in financial incentives for installing energy-saving equipment
- Pay less for monthly energy and water bills
- Reduce maintenance costs and extend equipment life
- Enhance visibility indoors and outdoors
- Create a more comfortable environment for occupants and staff

The program includes a no-cost, on-site energy assessment of your facility, performed by one of our authorized Trade Allies. After the assessment, you will receive customized recommendations for ways to save more energy, as well as detailed cost estimates for any relevant energy efficiency improvement projects.

0% Financing Available

For project costs not covered by financial incentives, a 0% interest loan program is available.

Cash Incentives

Public institutions can save up to 80% on new equipment, including labor. Incentives are instant, so you don't have to front the cost and wait for reimbursement.

Incentives cover a variety of energy-saving equipment:

Lighting retrofits, including fixtures, sensors, and controls

Heating, ventilation, and air conditioning (HVAC) systems, including HVAC controls

Refrigeration controls

Commercial kitchen equipment

Motors and variable frequency drives

Contact the Trade Ally in your area to start saving at your public facility.
