

Multifamily Program Prescriptive and Custom Incentives

Updated: 6/26/25

ABOUT THE PROGRAM

The Multifamily Prescriptive and Custom pathway makes it easy for customers to install one-for-one energy-efficient equipment and control replacements across a wide range of technologies and receive quick incentives. Prescriptive incentives cover equipment listed below for heating and cooling, refrigeration, specialized controls, LED lighting and controls, kitchen equipment, and more.

Some manufacturers, industrial companies, and data and distribution centers have complex energy needs that cannot be met completely by prescriptive solutions. For those businesses, Atlantic City Electric offers custom solutions and incentives. Custom incentives allow for non- standard, more complex electric energy efficiency measures that are not defined as a prescriptive measure to receive an incentive.

Process

- 1. Complete the Multifamily Prescriptive & Custom incentive workbook and submit as an application on our online portal.
- 2. Receive a confirmation email that your application has been received. If your project meets all eligibility requirements, your application will be approved.
- 3. Receive your application pre-approval letter.
- 4. Install equipment and submit project closeout requirements.
- 5. Receive your incentive.

For more information on all our offerings, visit atlanticcityelectric.com/Multifamily or contact us at 833.ACE.PAYS (223.7297) or ace.energysavings@trccompanies.com

MULTIFAMILY PRESCRIPTIVE INCENTIVES

Prescriptive Incentives are available to eligible equipment types listed below. For other models or equipment types not listed below, see the Custom Incentives that are available on the last page.

<u>Note:</u> For lighting measures incentivized based on DLC primary use category, only products listed under v5.1 of the Solid-State Qualified Products List are eligible for incentive

MULTIFAMILY CUSTOM INCENTIVES

The Custom pathway provides customers the opportunity to implement non-standard, more complex energy efficiency measures that are not defined as a prescriptive measure. Through the Custom pathway, we help customers develop projects that best meet their unique facility and organizational goals. Custom Measures do not include maintenance or repair measures. Custom projects are typically multi-measure or optimization solutions for which customers earn performance-based incentives for kWh and therm savings.

CUSTOM MEASURES		
Typical Custom Equipment and Building Improvements	Incentive	Income-Eligible Incentive
Compressed Air		30% Adder
HVAC/Chillers	\$0.30 per est. annual kWh saved* \$3.75 per est. annual therm saved*	30% Adder
HVAC Controls		30% Adder
Motors/VFD		30% Adder
Building Envelope Improvements		30% Adder
Custom Lighting	\$0.16 per est. annual kWh saved*	30% Adder

^{*}Projects are subject to program incentive caps including but not limited to 75% of relevant project costs or a buy-down to a 2-year payback, whichever is less.

INCOME ELIGIBILITY CRITERIA

In some cases, income eligible multifamily buildings are eligible for increased incentives and financing thresholds. A multifamily property will be considered income eligible if one of the following criteria is met.

- 1. **Affordable housing designation:** any residential building that an official document identifying the customer as participating in a federal, state, or local affordable housing program (e.g., New Jersey Housing and Mortgage Finance Agency, United States Low Income Housing Tax Credit, United States Housing and Urban Development, housing owned and operated by Public Housing Authorities, Section 8, Section 202, Section 811).
- 2. Physical location: A property identified in a physical location classified as a low-income zone:
 - a. **Census tract:** residences and businesses located within a low- or moderate-income census tract. Census tract confirmation can be verified at https://geomap.ffiec.gov/FFIECGeocMap/GeocodeMap1.aspx (using the 2023 or 2024 lookup)
 - b. **Overburdened Community (OBC):** residences and businesses located within an OBC "Low Income" community will be eligible for enhanced incentives and their impacts can accumulate towards the LMI/OBC QPIs. Only customers in the following OBC categories, as defined by the New Jersey Department of Environmental Protection8 ("DEP") will be tracked and reported:
 - i. Low Income
 - ii. Low Income and Limited English
 - iii. Low Income and Minority
 - iv. Low Income, Minority, and Limited English

OBC confirmation can be verified at Overburdened Communities | NJ Environmental Justice Mapping, Assessment and Protection Tool (EJMAP) using these three 2021 Archived Layer List criteria:

- i. 2021 Overburdened Communities and Adjacent Block Groups
- ii. 2021 Municipalities with Overburdened Communities under the NJ Environmental Justice Law
